- 1.2 L water tank and refill anytime during ironing
- Compact size and light weight iron for easier storage

Easy to use
- Calc Clean system with sound and light calc clean reminder
- Vertical steam for crease removal in hanging fabrics

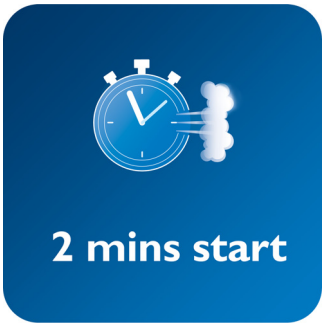
PHILIPS

Highlights

Refill the watertank any time

The seperate watertank allows you to re-fill the watertank any time, even during ironing, without waiting.

Steam ready in 2 minutes



Steam is ready at maximum level in 2 minutes, and refill the water at anytime

Smart Calc clean system

A clean reminder is to ensure that descaling and cleaning is done regularly. A second defense step to protect the steam generator from scale is integrated: the steam function gets disabled if descaling is not done after 1 hour steam ironing once the reminder came up. After descaling is done, the steam function will be restored. This takes place regardless of the type of water used. In order to perform Calc clean effortless, a smart calc clean container is provided to place the iron without holding the iron over the sink for 2 mins; After that, your steam generator iron is ready to use again.

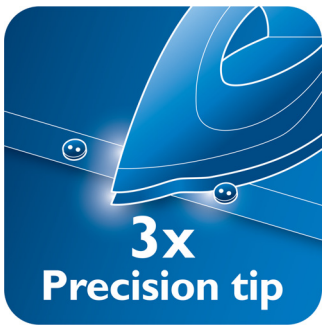
Vertical steam

This Philips iron has a vertical steam function, for crease removal in hanging fabrics.

1.2 L water tank

SpeedCare steam generator has 1.2 L water tank capacity to allow your iron more than 1 hour, it helps you reduce the frequecy of refilling everytime for the big laundry loads. The technology will also allow you refill the water tank during ironing without cooling down the appliance for 2 hours waiting to reill.

Triple precision tip



The tip of this Philips iron is precise in 3 ways: it has a pointed tip, button groove and a sleek design of the nose. Triple Precision tip enables you to reach even into the most tricky areas, e.g. around the buttons or between the pleats.

Non-stick soleplate

The soleplate of your Philips iron is coated with a special non-stick layer for good gliding performance on all fabrics.

Continuous steam output

Double your ironing speed with the high performance steam. Steam penerates deep into fabrics, making your ironing faster and easy, even on difficult fabrics. The more steam is, the better and faster ironing.

Max 4 bar pump pressure

Thanks to the high pressure pump equiped in the appliance. It transfers the water to the iron generating powerful steam. It made the Compact ProVelocity steam engine possible with all the time powerful and constant steam coming out from the soleplate without water condensations.
